

**May 2005:**

Greetings Herscu Letter Subscribers:

For those of you who have read **Letters** #33-38, you know that they cover the question of epidemics and homeopathy. Since those were written, during bad epidemics Dr. Herscu has been following the *genius epidemicus* and sending out updates accordingly.

As a recent email noted, he has been unable to continue to do that in detail for a number of reasons. However interestingly he has just completed writing the *materia medica* of *Mercurius* in **Letters** #86-88 and we seem to be coincidentally in the midst of a *Mercurius* Upper Respiratory Flu (in this particular case: sore throat, swollen glands, body aches, alternating between hot/cold, fever/chilly, wanting to be covered/uncovered).

We yet again wanted to offer for those of you who have not yet received **Herscu Letters** #33-38, to receive them out of sequence if you wish to read them at this time.

As always, not everyone will need the *genius epidemicus* - so it is important to be sure to continue to treat the individual. At this point, Dr. Herscu would usually send out information specifically describing the symptoms of those that would need *Mercurius*. However as he just completed that *materia medica*, we are offering that you may receive those **Letters** out of sequence as well.

Any **Letters** received out of sequence, will be paid for now and then not charged for in the future when you re-receive those **Letters** as part of your normal sequence of **Letters**. If you would like to receive them now, let me know.

Best regards,

Kim McGuire  
Managing Editor  
Herscu Letter
